## WE ARE A SERVICE PROVIDER FOR A NUMBER OF FIRE & SAFETY PRODUCTS AND SERVICES

Working fire safety equipment will cut the risk of loss of life and property by 50%. The faster you know about a fire, the faster you can respond and save lives.

"Fire and safety codes are often written in blood, because it takes a loss of life and or property for such laws to be written"! Those words have stuck with me for decades as I worked in this industry. Although, there's nothing wrong with what's written in public and private fire and safety codes, it's the enforcement and training there in!

## AFFILIATIONS/CERTIFICATES:

We provide training and system installations, as well as IROL Inspection reporting to AHJ's, property owners, property management companies, insurance companies, and fire marshals.
